

BYOD @ Chelsea Heights Primary School

Program Overview

The focus of the BYOD program at Chelsea Heights Primary School is to provide tools and resources to the 21st-Century Learner. A successful BYOD program requires technology to be seamlessly integrated throughout the school's curriculum. Increased access to technology is essential for teaching students skills for a future in which, as societal trends suggest, digital literacy is key. The individual use of personal devices is a way to empower students to work to their full potential and develop essential learning habits with the support of digital tools.

Learning results from continuous dynamic interaction among students, educators, parents and the extended community. Technology immersion does not diminish the vital role of the teacher. On the contrary, it transforms the teacher from a director of learning to a facilitator of learning. Effective teaching and learning with technology integrates technology into the curriculum any time, any place.

Families can choose to bring their own iPad from home or purchase a new device. The iPad model must be an iPad 6 or later however, if you wish to purchase a new device please see the attached paperwork for details on how to achieve this through JB HiFi. The iPads available on the CHPS JB HiFi portal are the latest iPads and are offered at a slightly discounted education price.

An iPad that can be updated to the latest firmware (iOS 13) is recommended.
